The Fair Starting Line

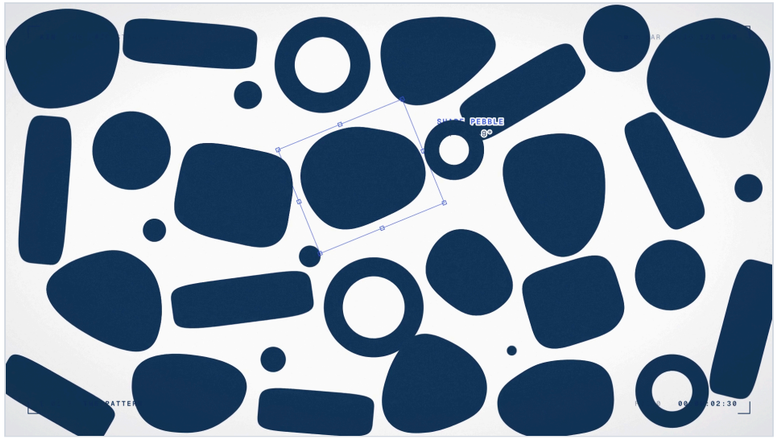

Ten wallets. One funder. One limit.

1920×1080 · 16:9 60 FPS · 1,800 FRAMES H.264 · AAC 48 KHZ 128 BPM · 16 BARS FRAGMENTATION → DISCOVERY → CONNECTION → ENFORCEMENT → FAIRNESS → BRAND

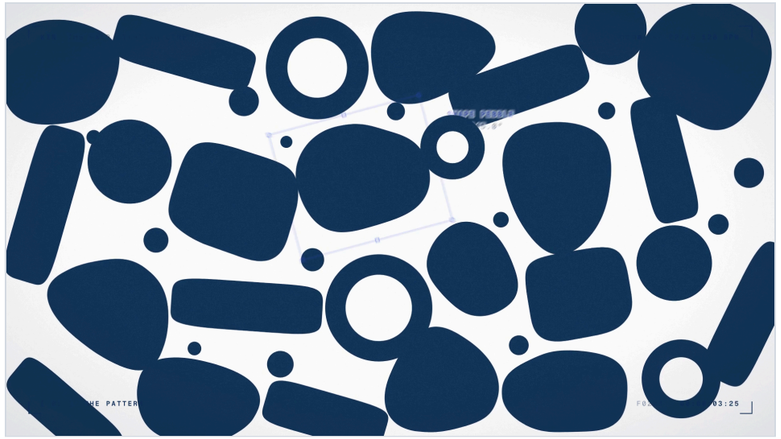

Cut on a 128 BPM grid: 16 bars are exactly 30 seconds, every cut lands on a bar line and every accent on a beat. Keyframes are taken from the final rendered video. Product claims follow the Kin site and repository: wallets funded by the same source share one buy limit, enforced in the pool by a Uniswap v4 hook; launches run on Base Sepolia (testnet). Kin links wallets by funding, not by identity, and makes splitting costly and visible; it does not claim to catch every split.
